

Utkarsh Upadhyay

Frontend Developer | hello@utkupadhyay.com

A professional with **9** plus years of experience in frontend development. Proficient in React, Redux Javascript seeking a job role in an organisation wherein as an individual can learn, unlearn and relearn the skills that helps the organisation as well as enhances my understanding about the new technologies.

Experience

Honeywell Technology Solutions

Senior Advanced Cloud Developer | March 2022 – Present

- Leading a team of frontend developers
- Scale and develop an enterprise product using React, Redux, SCSS, Jest, Enzyme
- Working on micro-frontend architecture based UI
- Building reusable components to be used across different UI screens
- Optimize, enhance and secure the UI application

Accion Labs

Senior Software Engineer | July 2021 – March 2022

- Created and managed React JS based application that featured user actions like drag-drop, upload and download for managing large data files.
- Developed and managed a serverless architecture (AWS) using AWS Appsync, Amplify, DynamoDB, Cognito and Lambda
- Implemented continuous improvement to the application that included unit-tests, code-refactor and improvements in the performance.

Skillsoft

Software Engineer II | May 2019 - July 2021

- Created new features like Advanced Search (with filters), Authentication, Authorization and new languages support for the web and chrome extension app Percipio.
- Migrated Node JS based BFF from REST API to GraphQL for various services.
- Implemented prototypes, constructor and other OOJS concepts to create and add new functionalities to the existing codebase.

TVS Next (Client - Skillsoft)

Senior Software Engineer | Oct 2018 - April 2019

- Worked on React Native cross platform app called Percipio
- Developed mobile application with cross-platform (Android and iOS) functionality.
- Developed POC for 'Badges'. A user who completed his/her training could share the badge on social platforms.

HCL Technologies

Senior Analyst | Oct 2014 - July 2018

- Worked on several Projects like **Johnson & Johnson, UPM,**

Exxon Mobile

- Migrated from jQuery to React 15.XX
- Worked as UI Developer. Tech stack included HTML, CSS Bootstrap
- Integrated React to existing static HTML sites
